

Air Jet Ducting

Colour

Red

Temperature Range

-40°C to +177°C (-40°F to 350°F)

Ends

Stainless Steel collar & pin lug ends with incorporated straps for easy storage

Material

Durable Safety Orange for high visibility. Coated urethane polyester fabric

Stock Sizes

12"

Available Sizes

12"

Standard Stock Sizes

12ft, 25ft

Product Information

Air Jet ducting is designed as an economical solution for heat delivery on indirect fired heaters

Designed to transfer hot air up to 177°C (350°F) and constructed to last through demanding winter conditions

Made with durable urethane polyester fabric designed to work in sub-zero temperatures with industry leading indirect heater. Utilizes a stainless steel collar and silicone infused fabric for long-lasting resistance to initial high temperatures from the heater.

Product Applications

AR **FUME** **DUST** **MATERIAL**

Notes

UV Resistant

*Pressures based on straight lengths of hose @ 72°F
